INDEX.

A.

Acetureid, acetyl-urea, othyl-urea, 159.
Acetylammonium, oxide of, 150.
—— sulphate of, 152.
Acid, acetic, osmose of, 59.
—— arsenious, and its salts, volumetric estimation of, 236.
—— citric, osmose of, 69.
—— ferric, volumetric estimation of, 232.
—— hydriodic, on the action of, upon glycerine, by Berthelot and de Luca, 192.
—— hydrochloric, osmose of, 58.
—— hypogæic, on a new fatty acid obtained from earth-nut oil, by A. Gössmann and H. Scheven, 279.
—— iodic, volumetric estimation of, 232.
—— manganic, volumetric estimation of, 232.
—— nitrophthalinic, 303.
—— nitric, action of, on papaverine, 283.
———— on the action of, upon tartanil and tartanilide, 181.
———— osmose of, 58.
—— oxalic, osmose of, 48.
—— palmitic, from *Stillingia sebifera*, 5.
—— phosphoric, osmose of, 59.
—— pyrotartaric, on the anilides of, by E. Arppe, 172.
—— pyrotartanilic, 172.
—— pyrotartonitranilic, 174.
—— racemic, anilides of, 181.
———— osmose of, 59.
—— salicylic, on, by R. Piria, 182.
—— selenic, volumetric estimation of, 232.
—— sulphobutylic, 271.
—— sulphuric, on an easy method of purifying, from arsenic, by A. Buchner, 258.
—— sulphurous, and sulphuretted hydrogen, volumetric determination of, 227.
—— tannic, action of, with paranitraniline, 178.
—— tartanilic, 180.
—— tartaric, on the anilides of, by E. Arppe, 179.
———— on a new reaction of, 306.
———— osmose of, 59.
—— vanadic, volumetric estimation of, 232.
Adie, R., on the thermo-electrical currents generated in elements where bismuth is used to form the joints, 33.
—— on thermo-electric joints formed with the metals antimony, bismuth, and palladium, 36.
Adie, R., on the hydro-electric currents generated by couples formed of a single metal, 295.
Alcohol, action of chloride of zinc on butylic, 265.
—— on amylic, by L. Pasteur, 277.
—— on benzoic, by S. Cannizzaro, 169.
—— on butylic, by A. Wurtz, 264.
—— on cuminic, by C. Kraut, 166.
—— on the formation of, from olefiant gas, by M. Berthelot, 148.
—— osmose of, 61.
Aldehyde, on caprylic, by H. Limpricht, 155.
—— radicals, on the substitution of the, in ammonia, by J. Natanson, 150.
Alkalies, on the preparation of the metals of the, and alkaline earths, by electrolysis, by A. Matthiessen, 27.
Alumina, acetate of, osmose of, 86.
—— sulphate of, osmose of, 85.
Aluminium, chloride of, osmose of, 85.
—— on, by H. Deville, 239.
—— properties of, 241.
Amarine, on a new mode of formation of, and of ethylamine and lophine, by A. Gössmann, 161.
Ammonia, amount of, in Southwark and Lambeth waters, 102.
—— carbonate of glucina and, 247.
—— on the substitution of the aldehyde radicals in, by J. Natanson, 150.
—— oxalate of glucina and, 249.
—— pyrotartanilate of, 173.
—— tartanilate of, 181.
Ammonium, chloride of cadmium and, 253.
—— oil of mustard with hydrosulphate of, 184.
—— sulphate of cadmium and, 255.
Analysis, on a method of volumetric, of very general application, by R. Bunsen, 219.
Anderson, T., on papaverine, 283.

Anilides of racemic acid, 181.
—— on the, of tartaric acid, by E. Arppe, 179.
Antimony-salts, osmose of, 92.
—— on thermo-electric joints formed with, and with bismuth and palladium, by R. Adie, 36.
Arabin, on, by C. Neubauer, 307.
Arppe, E., on nitraniline and paranitraniline, 175.
—— on the anilides of pyrotartaric acid, 172.
—— on the anilides of tartaric acid, 179.
Arsenic, on an easy method of purifying sulphuric acid from, by A. Buchner, 258.
Azobenzole and benzidine, by A. Noble, 292.

B.

Barium, chloride of cadmium and, 254.
—— chloride of, osmose of, 71.
—— a few notes on, by A. Matthiessen, 294.
—— oil of mustard with hydrosulphate of, 186.
—— oil of mustard with sulphide of, 186.
Baryta, hydrate of, osmose of, 84.
—— salt, of hypogæic acid, 281.
—— tartanilate of, 181.
Benzidine and azobenzole, by A. Noble, 292.
Benzoyl-urea, 160.
Bertagnini, C., on phillyrin, 187.
Berthelot and de Luca, on the action of hydriodic acid upon glycerine, 192.
———— on the action of iodide of phosphorus upon glycerine, 145.
—— on the formation of alcohol from olefiant gas, 148.
Bismuth, on the thermo-electric currents generated in elements where, is used to form the joint, by R. Adie, 33.
—— on the thermo-electric joints formed with the metals antimony, palladium, and, by R. Adie, 36.
Bisulphites, compounds of the ketones with alkaline, by H. Limpricht, 154.
Bromine, action of, on papaverine, 284.
—— and chlorine together, volumetric determination of, 225.
—— on the volatile bromine-compound obtained in the technical preparation of, by M. Hermann, 286.
—— volumetric determination of, 224.
Buchner, A., on an easy method of purifying sulphuric acid from arsenic, 258.
Bunsen, R., and H. E. Roscoe, photochemical researches, 193.
—— on a method of volumetric analysis of very general application, 219.
Bunsen on the preparation of lithium, 143.
Butyl, 266.
—— acetate of, 271.
—— bromide of, 267.
—— carbonate of, 269.
—— chloride of, 266.
—— iodide of, 267.
—— nitrate of, 270.
—— sulphate of, 270.
Butylamine, 272.
Butyryl-urea, 160.

C.

Cadmium, on some salts of, by C. von Hauer, 251.
—— ammonio-chloride of, 252.
—— and ammonium, chloride of, 253.
—— and barium, chloride of, 254.
—— and potassium, chloride of, 253.
—— and sodium, chloride of, 254.
—— bromide of, and bromide of potassium, 255.
—— nitrate of, 251.
—— salts, osmose of, 89.
—— sulphate of, 251–2.
—— and ammonium, sulphate of, 255.
—— and potassium, sulphate of, 256.
—— and sodium, sulphate of, 257.
Calcium, chloride of, osmose of, 73.
—— oil of mustard with hydrosulphate of, 187.
—— preparation of, by electrolysis, 28.
Cannizzaro, S., on benzoic alcohol, 169.
Casselmann, A., on tartrate of lime, and a new reaction of tartaric acid, 306.
Cerium and lanthanum, volumetric separation of, 232.
Charcoal, on platinised, by J. Stenhouse, 105.
Chemical Society, proceedings at the meetings of the, 38, 116, 297.
Chiozza, L., and Frapolli, A., on coumaramine, a new organic base derived from nitrocoumarine, 301.
Chlorates, volumetric estimation of, 229.
Chlorine, action of, on papaverine, 285.
—— and bromine together, volumetric determination of, 225.
—— and iodine together, volumetric determination of, 224.
—— on the absorption of, in water, by H. E. Roscoe, 15.
—— volumetric determination of, 223.
Chlorites and hypochlorites, volumetric determination of, 226.
Chromates, volumetric estimation of, 227.
Cobalt, lead, manganese, and nickel, volumetric estimation of the peroxides of, 230.
—— salts, osmose of, 89.

Copper, on the colour of chloride of, in different states of hydration, by J. H. Gladstone, 211.
—— oxychloride of, 213.
—— salt of hypogæic acid, 281.
———— osmose of, 89.
Council, report of the, 109.
Coumaramine, 301.

D.

Dean, J. and F. Wöhler, on telluromethyl, 164.
Debray, H., on glucinum and its compounds, 242.
De Luca and Berthelot on the action of hydriodic acid upon glycerine, 192.
Deville, H., on aluminium, 239.
Dusart, L., on some derivatives of naphthalin, 303.
—— on a new mode of producing propylene, 305.

E.

Earth-nut oil, on hypogæic acid, a new fatty acid obtained from, 279.
Efflorescence, on a peculiar, of the chloride of potassium, by R. Warington, 30.
Ether, butylic, 268.
—— hypogæic, 281.
—— vino-butylic, 269.
Ethylamine, on a new mode of formation of, and of amarine and lophine, by A. Gössmann, 161.
Ethylene, easy method of preparing chloride of, by H. Limpricht, 157.

F.

Frapolli, A., and Chiozza, L., on coumaramine, a new organic base derived from nitrocoumarine, 301.

G.

Gladstone, J. H., on the colour of chloride of copper in different states of hydration, 211.
Glucina, 244.
—— carbonate of, 246.
—— and ammonia, carbonate of, 247.
—— and potash, carbonate of, 247.
—— oxalate of, 247.
—— and ammonia, oxalate of, 248.
—— and potash, oxalate of, 247.
—— sulphate of, 245.
Glucinum, on, and its compounds, by H. Debray, 242.
Glycerine, on the action of iodide of phosphorus upon, by Berthelot and de Luca, 145.
—— on the action of hydriodic acid upon, by Berthelot and de Luca, 192.
Gold and platinum salts, osmose of, 93.
—— terchloride of, osmose of, 69.
Gössmann, A., and Scheven, H., on hypogæic acid, a new fatty acid obtained from earth-nut oil, 279.
—— on a new mode of formation of ethylamine, amarine, and lophine, 161.
Graham, T., on osmotic force, 43.

H.

Hauer, C. von, on some salts of cadmium, 251.
Haines, R., on the volatile oils of *Ptychotis Ajwan*, 289.
Heintz, W., on the products of the decomposition of stearate of lime, 308.
Hermann, M., on the volatile bromine-compound obtained in the technical preparation of bromine, 286.
Houzeau, A., researches on oxygen in the nascent state, 237.
Humann, E., on butylic mercaptan and butylic urethane, 274.
Hydrochlorate of nitraniline, 176.
Hydro-electric currents, on the, generated by couples formed of a single metal, by R. Adie, 295.
Hydrogen, sulphuretted, and sulphurous acid, volumetric determination of, 227.
Hydrosulphate of mustard oil, on some compounds of, by H. Will, 183.
—— of ammonium, oil of mustard with, 184.
—— of barium, oil of mustard with, 186.
—— of calcium, oil of mustard with, 187.
—— of potassium, oil of mustard with, 184.
—— of sodium, oil of mustard with, 185.
Hypochlorites and chlorites, volumetric determination of, 226.
Hypogæic ether, 281.

I.

Iodine, action of, on papaverine, 285.
—— volumetric determination of, 222.
—— and chlorine together, volumetric determination of, 224.
Iodopropylene, 145.
Iron, nitrate of sesquioxide of, osmose of, 88.
—— protochloride of, osmose of, 88.
—— protosulphate of, osmose of, 87.

K.

Ketones, compounds of the, with alkaline bisulphites, by H. Limpricht, 154.
Kraut, C., on cuminic alcohol, 166.

L.

Lanthanum and cerium, volumetric separation of, 232.
Lead, manganese, nickel, and cobalt, volumetric estimation of the peroxides of, 230.
—— salts, osmose of, 90.
Leucin, preparation of, from the aldehyde of valerianic acid, by H. Limpricht, 157.
Liebig, J., on the mellonides, 259.
Lime, hydrate of, osmose of, 85.
—— nitrate of, osmose of, 85.
Limpricht, H., on an easy method of preparing chloride of ethylene, by, 157.
—— on the compounds of the ketones with alkaline bisulphites, 154.
—— on caprylic aldehyde, 155.
—— on the metaldehyde of valerianic acid, 157.
—— on the preparation of leucin from the aldehyde of valerianic acid, 157.
Lithium, on the preparation of, by R. Bunsen, 143.
Lophine, on a new mode of formation of ethylamine, amarine, and, by A. Gössmann, 161.
Löwig, R., on some compounds of stibethylium, 260.

M.

Magnesia, nitrate of, osmose of, 85.
—— sulphate of, osmose of, 67.
Magnesium, chloride of, osmose of, 85.
—— on the preparation of strontium and, by A. Matthiessen, 107.
Manganese, lead, nickel, and cobalt, volumetric estimation of the peroxides of, 230.
—— salts, osmose of, 88.
Mangostin, on, by W. Schmid, 190.
Maskelyne, N. S., investigation of the vegetable tallow from a Chinese plant, the "Stillingia sebifera," 1.
Matthiessen, A., on the preparation of strontium and magnesium, 107.
—— on the preparation of the metals of the alkalies and alkaline earths by electrolysis, 27.
—— a few notes on barium, 294.
Mellonides, on the, by J. Liebig, 259.
Mercaptan, on butylic, and butylic urethane, by E. Humann, 274.
Mercury, chloride of stibethylium and, 262.
Mercury, iodide of stibethylium and, 261.
—— on the preparation of the sulphochloride of, in the dry way, by R. Schneider, 257.
—— salts, osmose of, 92.
Metaldehyde, on the, of valerianic acid, by H. Limpricht, 157.
Metropolis, chemical composition of the waters of the, during the autumn and winter of 1854, by R. D. Thomson, 91.
Moldenhauer, F., and N. Zinin, on compound ureas, 158.
Mustard oil, on some compounds of hydrosulphate of, by H. Will, 183.
———— with hydrosulphate of ammonium, 184.
———— with hydrosulphate of barium, 186.
———— with hydrosulphate of calcium, 187.
———— with hydrosulphate of potassium, 184.
———— with hydrosulphate of sodium, 185.
———— with sulphide of barium, 186.
———— with sulphide of potassium, 185.

N.

Naphthalin, on some derivatives of, by L. Dusart, 303.
Natanson, J., on the substitution of the aldehyde radicals in ammonia, 150.
Neubauer, C., on arabin, 307.
Nickel, lead, manganese, and cobalt, volumetric estimation of the peroxides of, 230.
—— salts, osmose of, 89.
Nitraniline, on, and paranitraniline, by E. Arppe, 175.
—— hydrochlorate of, 176.
—— nitrate of, 177.
—— sulphate of, 177.
Nitrate of paranitraniline, 178.
Nitrocoumarine, 301.
Noble, A., on azobenzole and benzidine, 292.

O.

Oils, on the volatile of *Ptychotis Ajwan*, by R. Haines, 289.
Olefiant gas, on the formation of alcohol from, by M. Berthelot, 148.
Osmotic force, on, by T. Graham, 43.
Oxide, ferrous, volumetric estimation of, alone and in conjunction with ferric oxide, 234.
Oxychloride of copper, 213.
Oxygen, researches on, in the nascent state, by A. Houzeau, 237.
Ozone, volumetric estimation of, 232.

P.

Palladium, on thermo-electric joints formed with the metals antimony, bismuth, and, by R. Adie, 36.
Palmitate of baryta, 8.
—— copper, 10.
—— lead, 9.
—— magnesia, 9.
—— silver, 10.
—— soda, 8.
—— oxide of ethyl, 11.
—— lipylic oxide, 7.
Palmitic ether, 11.
Palmitine, 7.
Palmitone, 11.
Papaverine, on, by T. Anderson, 283.
Paranitraniline, on nitraniline and, by E. Arppe, 175.
Pasteur, L., on amylic alcohol, p. 277.
Phillygenin, 188.
Phillyrin, on, by C. Bertagnini, 187.
Photochemical researches, by R. Bunsen and H. E. Roscoe, 193.
Phosphorus, on the action of iodide of, upon glycerine, by Berthelot and de Luca, 145.
Phthalidine, 303.
Piria, R., on salicylic acid, 182.
Platinised charcoal, on, by J. Stenhouse, 105.
Platinum, bichloride of, osmose of, 69.
—— chloride of stibethylium and, 262.
—— salts of nitraniline, 176.
Potash, carbonate of glucina and, 247.
—— carbonate of, osmose of, 73.
—— chromate of, osmose of, 82.
—— oxalate of glucina and, 247.
—— bichromate of, osmose of, 82.
—— bisulphate of, osmose of, 60.
—— hydrate of, osmose of, 73.
—— oxalate of, osmose of, 82.
—— and soda, sulphates of, osmose of, 80.
Potassium, bromide of cadmium and bromide of, 255.
—— chloride of cadmium and, 253.
—— sulphate of cadmium and, 256.
—— oil of mustard with sulphide of, 185.
—— oil of mustard with hydrosulphate of, 184.
—— tartrate of, 306.
—— products of decomposition of stearate of, 308.
—— on a peculiar efflorescence of the chloride of, by R. Warington, 30.
Propylene gas, 147.
—— formation of propylic alcohol from, 149.
—— on a new mode of producing, by L. Dusart, 303.
Ptychotis Ajwan, on the volatile oils of, by R. Haines, 289.
Pyrotartanil, 172.
Pyrotartanilate of ammonia, 173.
Pyrotartonitranil, 174.

R.

Roscoe, H. E., and R. Bunsen, photochemical researches, 193.
—— H. E., on the absorption of chlorine in water, 15.

S.

Schmid, W., on mangostin, 190.
Schneider, R., on the preparation of sulphochloride of mercury in the dry way, 257.
Silicium, new form of, 242.
Silver-salts, osmose of, 93.
—— tartanilate of, 181.
Soda and potash, sulphates of, osmose of, 80.
—— phosphate and carbonate of, osmose of, 77.
—— lime, action of, on papaverine, 286.
Sodium, chloride of, osmose of, 69.
—— chloride of cadmium and, 254.
—— sulphate of cadmium and, 257.
—— oil of mustard with hydrosulphate of, 185.
Spirit of wine, report on the supply of, free from duty, for use in the arts and manufactures, by Professors Graham, Hofmann, and Redwood, 120.
Stearate of lime, products of decomposition of stearate of, 308.
Stearone, 308.
Stenhouse, J., on platinised charcoal, 105.
Stibethylium, on some compounds of, by R. Löwig, 260.
—— bromide of, 263.
—— iodide of, 260.
—— sulphide of, 263.
—— chloride of, 262.
—— and mercury, chloride of, 262.
—— and platinum, chloride of, 262.
—— and mercury, iodide of, 261.
—— hydrated oxide of, 263.
Stillingia sebifera, investigation of the vegetable tallow from a Chinese plant, the, by N. S. Maskelyne, 1.
Strontium, chloride of, osmose of, 85.
—— on the preparation of, and magnesium, by A. Matthiessen, 107.
Sugar, osmose of, 63.
Sulphate of nitraniline, 177.
—— of paranitraniline, 178.
Sulphide of barium, oil of mustard with, 186.
—— of potassium, oil of mustard with, 185.

T.

Tartanil, 180.
—— on the action of nitric acid upon, and tartanilide, 181.
Tartanilide, 179.
—— on the action of nitric acid upon tartanil and, 181.
Tartanilate of ammonia, 181.
—— of baryta, 181.
—— of silver, 181.
Tartrate of paranitraniline, 178.
—— of lime, and a new reaction of tartaric acid, by A. Casselmann, 306.
Telluromethyl, on, by F. Wöhler and J. Dean, 164.
Thermo-electric currents, on the, generated in elements where bismuth is used to form the joint, by R. Adie, 33.
———— joints, on, formed with the metals antimony, bismuth, and palladium, by R. Adie, 36.
Thomson, R. D., on the chemical composition of the waters of the metropolis during the autumn and winter of 1854, 97.
Tin-salts, osmose of, 92.

U.

Uranium-salts, osmose of, 91.
Urethane, on butylic mercaptan, and butylic, 274.
Ureas, on compound, by N. Zinin and F. Moldenhauer, 158.

V.

Valerianic acid, on the metaldehyde of, by H. Limpricht, 157.
———— preparation of leucin from the aldehyde of, by H. Limpricht, 157.
———— investigation of the, from a Chinese plant, the "Stillingia sebifera," by N. S. Maskelyne, 1.
Valeryl-urea, 160.
Volumetric analysis, on a method of, of very general application, by R. Bunsen, 219.

W.

Warington, R., on a peculiar efflorescence of the chloride of potassium, 30.
Water, on the absorption of chlorine in, by H. E. Roscoe, 15.
Waters, chemical composition of the waters of the metropolis during the autumn and winter of 1854, by R. D. Thomson, 97.
—— softening process for, 104.
Will, H., on some compounds of hydrosulphate of mustard-oil, 183.
Wöhler, F., and J. Dean, on telluromethyl, 164.
Wurtz, A., on butylic alcohol, 264.

Z.

Zinc, action of chloride of, on butylic alcohol, 265.
—— salts, osmose of, 89.
Zinin, N., and F. Moldenhauer, on compound ureas, 158.

END OF VOL. VIII.

LONDON:
Printed by SPOTTISWOODE & Co.
New-street-Square.
